DATE MAILED: 12/27/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)				
Advisory Action	10/609,421	OHKURA ET AL.				
,, ,	Examiner	Art Unit				
	Kevin M Bernatz	1773				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address						
THE REPLY FILED 20 December 2004 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.						
PERIOD FOR RE	PLY [check either a) or b)]					
a) The period for reply expiresmonths from the mailing	•					
The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f). Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if						
imely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). 1. A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in						
37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.						
2. The proposed amendment(s) will not be entered because:						
(a) ⊠ they raise new issues that would require further consideration and/or search (see NOTE below);						
(b) they raise the issue of new matter (see Note b	·					
(c) ☐ they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or						
(d) they present additional claims without cancel	ng a corresponding number of fi	inally rejected claim	S.			
NOTE: <u>See Continuation Sheet</u> .						
3. Applicant's reply has overcome the following reject	ion(s):					
4. Newly proposed or amended claim(s) would canceling the non-allowable claim(s).	be allowable if submitted in a se	eparate, timely filed	amendment			
5. ☐ The a) ☐ affidavit, b) ☐ exhibit, or c) ☐ request for application in condition for allowance because: See	reconsideration has been consi e Continuation Sheet.	dered but does NO	T place the

Continuation of 2. NOTE: the proposed language was not previously considered and would require further search and/or consideration.

Continuation of 5, does NOT place the application in condition for allowance because: applicants' arguments are directed to the unentered amendment. In so far as they apply to the present rejections of record, applicants argue that "resist" has not been given the proper interpretation. The Examiner respectfully disagrees.

The Examiner notes that the resist is not a layer present in the final product, which is the structure that is presently being claimed. I.e. applicants have no support for the alledged structure of electrical conductor/insulator/resist/anodized layer wherein the anodized and insulator layer meet the claimed columnar parts limitations in base claim 11. The resist pointed to by applicants is a temporary layer whic is removed before the anodized layer is subsequently deposited and the only effect of the "resist" is to form the insulator layer into a pattern, hence the interpretation given by the Examiner to claim 15.

With regard to the proposed claim amendments, the Examiner deems that while the amended language of claim 6 would appear to distinguish over the art of record, further search and/or consideration would be required before any indication of patentability for claims 6 10. Regarding claim 11, the Examiner notes that the recited structure in Iwasaki et al. would appear to still read on the claimed limitations since Iwasaki et al. discloses a Si substrate/SiOx "insulator" layer/AlOx anodized layer, wherein the Si serves as an electrode and the columns are explicitly taught to extend to the substrate (i.e. the Si layer). Since they are taught to extend to the Si layer, the Examiner deems they must necessarily pass through the SiOx "insulator" laver.
